*This software is no longer supported.

Details

We test and support the most recent service pack, with the US English professional or business version of Windows. Windows Vista is supported for some versions, but not recommended.

Other systems

We do not support Apple OS X (also not with emulators or similar), or Linux. Pocket Observer 3 runs on Windows Mobile 6.1 (version 3.1) and Android 2.2 and higher (Pocket Observer version 3.3).

Detailed specifications

For detailed system requirements of current Noldus software and hardware, please see the document, 'system requirements for Noldus software' on <http://www.noldus.com/downloads>.

Windows 10

For the products that are released after January 2016, we support Windows 10 (64 bit), unless specified otherwise. Note however, that for certain hardware devices, there may always not be Windows 10 drivers available from their manufacturers. For the products released before January 2016, we tested whether the most recent version works with Windows 10. See the table whether your version is supported with this operating system.
